DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 4 recites the limitation "tube portion" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipate by Reum.

Reum teaches a tubular portion, 37, having an external diameter greater than an internal diameter of the tube end, (col. 3, lines 11-14), the tube end having a first external diameter and a second larger diameter when the tubular portion is inserted within the tube end, (fig. 1). Reum also teaches placing a coil spring, 33, around the tube end, the coil spring having an internal diameter less than the second larger diameter of the tube, forcing the tubular portion into the tube

end causing the tube to expand forcing the coil spring to expand wherein the coil spring exerts continuous radial compressive force around the tube end, (col. 3, lines 55-61).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2-4, 7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reum in view of Wiebe.

Reum teaches all the limitations of the claims except for the coiled spring being forced to expand from about 1% to about 5%, and the tube portion being barbed. Wiebe teaches the a barbed tube portion, (fig. 1). It would have been obvious to one having ordinary skill in the art at the time the invention was made, to provide the invention of Reum with a barbed tubular portion, as taught by Wiebe, in order to enhance the ability to connect the tubing to the fitting.

It would have been further obvious to have the coil spring to expand between 1% to about 5%, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art.

Allowable Subject Matter

7. Claims 5, 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hohmann et al. was cited to show another example of a tube fitting.
